SALES EXECUTIVE PERFORMANCE — PROJECT REPORT

1. Executive Summary

This report presents an end-to-end analysis of the Sales Executive Performance dataset, built and visualised entirely in Microsoft Excel as part of an analytics portfolio project. The dataset captures five-day sales activity for 20,000 sales executives spread across 12 regions in India, along with individual daily sales figures, monthly targets, and target-achievement percentages.

The workbook combines a large raw dataset with a Regional Overview summary, five region-specific performance dashboards, a consolidated Master Dashboard, and a dedicated Charts & Analytics sheet — together forming a complete, interactive reporting solution for tracking sales-team performance.

2. Project Objective

- Consolidate and clean a large-scale (20,000-row) sales-executive dataset for analysis.
- Design interactive Excel dashboards to monitor regional and individual sales performance.
- Track target achievement (Target Hit %) and identify top-performing executives by region.
- Compare performance across all 12 regions to surface strengths and improvement areas.
- Present findings through a professional, decision-ready reporting layout.

3. Dataset Overview

The core dataset ('Raw Data' sheet) contains 20,000 records with the following fields:

Field	Description
Emp Code	Unique identifier for each sales executive
Sales Executive	Name of the executive
Region	City / region of operation (12 regions)
Day 1 – Day 5	Daily sales units recorded over a 5-day period
Total Sales	Sum of Day 1 to Day 5 sales
Target	Assigned sales target (units)
Target Hit %	Total Sales as a percentage of Target
Away From Target %	Shortfall percentage from the assigned target

Key dataset statistics:

- Total sales executives analysed: 20,000

- Total sales units recorded: 55,63,351
- Average Target Hit %: 54.95%
- Regions covered: 12 (Surat, Pune, Patna, Jaipur, Delhi, Bangalore, Nagpur, Chennai, Ranchi, Mumbai, Hyderabad, Kolkata)

4. Tools & Techniques Used

- Microsoft Excel — data cleaning, structuring and validation
- PivotTables & PivotCharts for regional aggregation
- Formulas: SUM, AVERAGE, RANK, IF-based Target Hit % and Away From Target % calculations
- Conditional formatting to visually flag high/low performers
- Multiple linked dashboards with KPI cards, bar charts and leaderboards
- Cell styling, icon-based headers and a dedicated Cover sheet for navigation

5. Regional Performance Summary

The Regional Overview sheet aggregates performance across all 12 regions, ranked by total sales:

Region	Total Sales	Avg Sales	Avg Target Hit %	Executives	Top Exec Sales
Surat	4,84,282	275	55.0%	1,761	451
Pune	4,74,441	276.3	55.3%	1,717	436
Patna	4,71,239	273.8	54.8%	1,721	454
Jaipur	4,69,578	277	55.4%	1,695	452
Delhi	4,68,409	274.9	55.0%	1,704	458
Bangalore	4,52,579	279	55.8%	1,622	454
Nagpur	4,49,636	275.7	55.1%	1,631	453
Chennai	4,48,645	273.7	54.7%	1,639	450
Ranchi	4,45,378	274.4	54.9%	1,623	469
Mumbai	4,43,919	274.5	54.9%	1,617	463
Hyderabad	4,43,803	271.3	54.3%	1,636	447
Kolkata	4,43,442	271.4	54.3%	1,634	451

Surat leads in total sales volume, while Bangalore posts the highest average Target Hit % (55.8%), indicating stronger per-executive efficiency despite a smaller team size than Surat or Pune.

6. Region-Wise Dashboard Highlights

Dashboard 1 — Bangalore (Balanced Total Sales Performance)

1,622 executives · 4,52,579 total sales · 55.8% avg target hit. Top performer: Anuj Munda (454 units, 90.8% target hit).

Dashboard 2 — Chennai (Moderate Performance Analysis)

1,639 executives · 4,48,645 total sales · 54.7% avg target hit. Top performer: Sushma Joshi (450 units, 90% target hit).

Dashboard 3 — Jaipur (Target Hit % High Achievers)

1,695 executives · 4,69,578 total sales · 55.4% avg target hit. Top performer: Sudama Verma (452 units, 90.4% target hit).

Dashboard 4 — Kolkata (High-Value Comparative Analysis)

1,634 executives · 4,43,442 total sales · 54.3% avg target hit. Top performer: Sneha Munda (451 units, 90.2% target hit).

Dashboard 5 — Mumbai (Competitive Target Hit % Leaderboard)

1,617 executives · 4,43,919 total sales · 54.9% avg target hit. Top performer: Tahira Qureshi (463 units, 92.6% target hit — the highest individual Target Hit % across all five dashboards).

7. Master Dashboard

The Master Dashboard consolidates the five region-wise dashboards (Bangalore, Chennai, Jaipur, Kolkata, Mumbai — 8,207 executives, 22,58,163 total sales units, 55.0% average target hit) into a single navigable view, enabling side-by-side comparison of top performers and daily sales trends across regions.

8. Key Insights

- Only about 55% of the assigned target is being met on average across the company, indicating a company-wide gap between targets and achieved sales.
- Bangalore has the smallest executive base among the top regions yet achieves the highest average Target Hit % (55.8%), suggesting more consistent individual performance.
- Surat and Pune drive the highest total sales volume, largely due to having the largest executive headcounts (1,761 and 1,717 respectively).
- Hyderabad and Kolkata trail slightly behind other regions on both total sales and average Target Hit % (54.3%), marking them as areas for targeted improvement.
- Top performers across all dashboards consistently achieve 85–93% of their target, showing that top-tier executives are close to fully meeting assigned goals, while the broader base lags well behind.

9. Recommendations

- Investigate root causes behind the ~45% average shortfall from target — such as target-setting accuracy, regional demand variation, or training gaps.
- Study best practices from Bangalore's high-efficiency executives and replicate coaching methods in Hyderabad and Kolkata.
- Introduce daily/weekly progress tracking (using the Day 1–Day 5 breakdown) to catch underperformance early in the cycle.
- Recognise and incentivise top performers such as Tahira Qureshi, Anuj Munda, and Sudama Verma to reinforce high-achievement behaviour.
- Reassess targets for regions with consistently lower Target Hit % to ensure goals remain realistic and motivating.

10. Conclusion

This project demonstrates the use of Excel as a complete business-intelligence tool — from raw data structuring through to interactive, decision-ready dashboards. By combining regional summaries, individual leaderboards, and a consolidated master view, the workbook provides a clear, actionable picture of sales-executive performance across India, supporting both operational monitoring and strategic decision-making.
